Dr. J. Lederberg
Genetics Department
Stanford University
Palo Alto, California

Dear Dr. Lederberg:

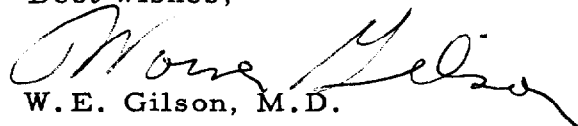

Thank you for your recent inquiry regarding our ultraviolet absorption meters. A descriptive brochure is enclosed.

The interference filters are made specifically for us, and because of our quantity purchases we believe that we can obtain a better price than you could get on a single purchase. We should be pleased to obtain a quotation for you for other wave lengths than those customarily supplied.

Ads on our other gadgets are enclosed for your possible interest. Our new metabolism chart is being sent separately.

I hope that you enjoy the California weather. On my last visit I was tempted to stay.

Best wishes,

W.E. Gilson, M.D.
